ZiO

EXCLUSIVE

Newal and ZiO are Turkish brands & company which is a leading provider of home appliances and cookware in the consumer products industry. Product range is around 400 different appliances and 500 different cookware, kitchenware, houseware items. Our product development centre in Turkey provides us with world class innovative products with our engineering and R&D centre, enabling Newal & ZiO to build strength into our product offering for the global consumers. High quality Newal & ZiO products are guaranteed against any manufacturing defect in materials or workmanship. Our organization has been serving the home appliances and cookware industry since 2002 and each of our products hold its own successful sales records.

Our core strategy is underpinned by the design and development of the world's best home appliances and cookware effectively marketing these globally. Our goal is to consistently provide innovative and good quality products at competitive prices. Newal & ZiO designed products are sold in over 30 countries which proves our ability to deliver products with genuine innovation and consumer appeal. Premium Europe Quality is applied everywhere to ensure that Newal & ZiO products have particularly long lives and operate reliably.

A new feature that yields an effective benefit for our customers is an advance that helps us too. We constantly strive to make our products more practical and efficient and easier to install. The safety of our customers is a key issue at our company policy. When developing our Newal & ZiO products, we apply state-of-the-art technology in order to exclude potential risks from the outset. Moreover, promoting good health, avoiding accidents and providing safe workplaces are an essential part of safety management program. Independent technical offices inspect all safety features to international standards before a product is rolled out. Every Newal & ZiO products also has to pass a strict safety test before shipment.

Make your life better...

Discover
the potential

The background features a dark, speckled granite countertop. In the upper center, several rectangular samples of granite in various colors (black, brown, tan, grey) are arranged in a row. A large, white, stylized question mark is positioned to the right of the text. The overall aesthetic is modern and industrial.

WHAT ARE **GRANITE** **COOKWARE** ■ FEATURES

With the removal of the teflon cookers from the kitchens, the granite pots were alternatives after ceramic pots as alternatives.

The granite pots, which resemble teflon pots with their appearance, attract attention of women with many characteristics. Granite pots are quite new for kitchens. Granite pots are made entirely of natural granite. Suitable granitic pots for health use, like ceramic pots, have non-stick properties.

Even with metal spoons, granite pots that are not scratch-resistant, abrasion-resistant and resistant to high fire can be easily washed in the dishwasher. But be careful when taking granite pots. Some companies also sell suitable finished teflon pots, only the outer surface of which is covered with a small amount of granite. When such small quantities of granite-coated pots are drawn, they are unsuitable for health, just like teflon pots.

Granite pots provide an even heat distribution while cooking, ensuring that the food is tastier.

TIME FOR INNOVATION

The Health of our family is really important to us.

We do not give up trying different cooking pots and pans for cooking delicious, healthy and appetizing foods.

Among the products that we use in the kitchen, we change cooking pots and pans the most. In these products, material and cooking techniques become the reason for preference rather than the brands.

And nowadays, Granite cooking pots and granite pans are launched apart from copper, aluminum, steel, Teflon, cast and ceramic.

Granite cooking pots and pans are solid like rock and also natural like rock because they are 100% manufactured from granite. You don't need to use oil while cooking on granite cooking pots and pans.

Thanks to its base that equally spreads the heat, your food is cooked in a healthy way with its true taste and without losing its vitamin values.

Originally, the granite technology has been developed from the Italian cooking techniques. Grooved bases immediately draw attention in the granite cooking pots. As you will guess, this feature prevents the direct contact between the food and the heat.

The heat that is being preserved for a long time is equally spread to every part of the food and food is completely cooked at the right consistency.

Designs of granite cooking pots and granite pans are ideal choices for women that want to have an esthetic mood in their kitchen.

Quality, classiness, health and deliciousness...
